Survey of Voting Conditions

I'm inviting voters statewide to join me in surveying how good or bad – and how equal or unequal – our voting conditions are. If you'd like to take part, print this page and bring it with you to the polls November 2. (Just don't leave it behind.) After you finish marking your ballot, take a moment to look around. Check your watch. Count things. Then, that night – or a week or two after – please tell me:

- * Your city or township, and your precinct number.

- * Your polling place. (Do other precincts use it, too?)

- * How many voting stations (standing and sit-down) did your precinct have? How many more would fit?

- * How many touch-screen voting machines?

- * How many vote-counting machines (tabulators)?

- * How many election inspectors? (Any room for more?)

- * What time did you go there, how long were you there, and how long did voting itself take you?

- * How long were the lines?

- * If you can find out, how many voters were registered in your precinct?

Send your answers – plus any comments on how the voting process worked – to John Anthony La Pietra for Fairer, Better Elections; 386 Boyer Court; Marshall, MI 49068. Or e-mail jalp4FBE@triton.net. (And feel free to include your name and your mailing or e-mail address . . . so I can thank you for your help.)
